Data source and methods

Incidence

Country-specific data source: Casablanca cancer registry, Rabat cancer registry
Method: Weighted/simple average of the most recent sub-national rates applied to 2022 population

[Click here to see detailed data source and methods](#)

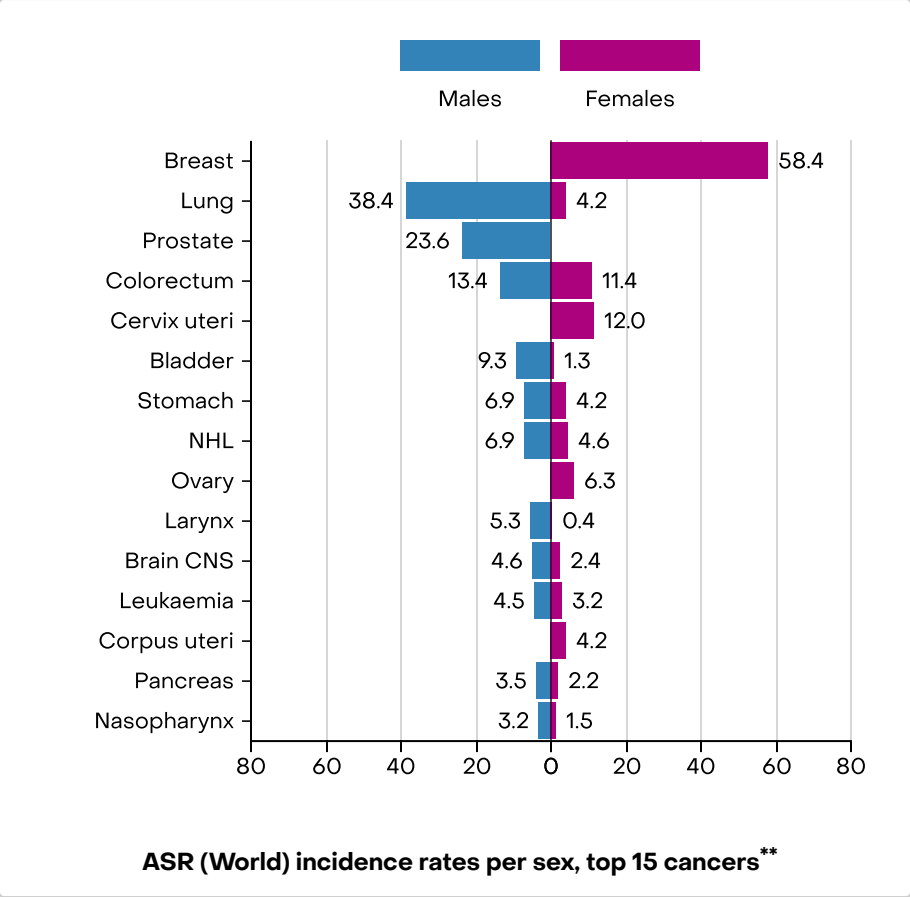

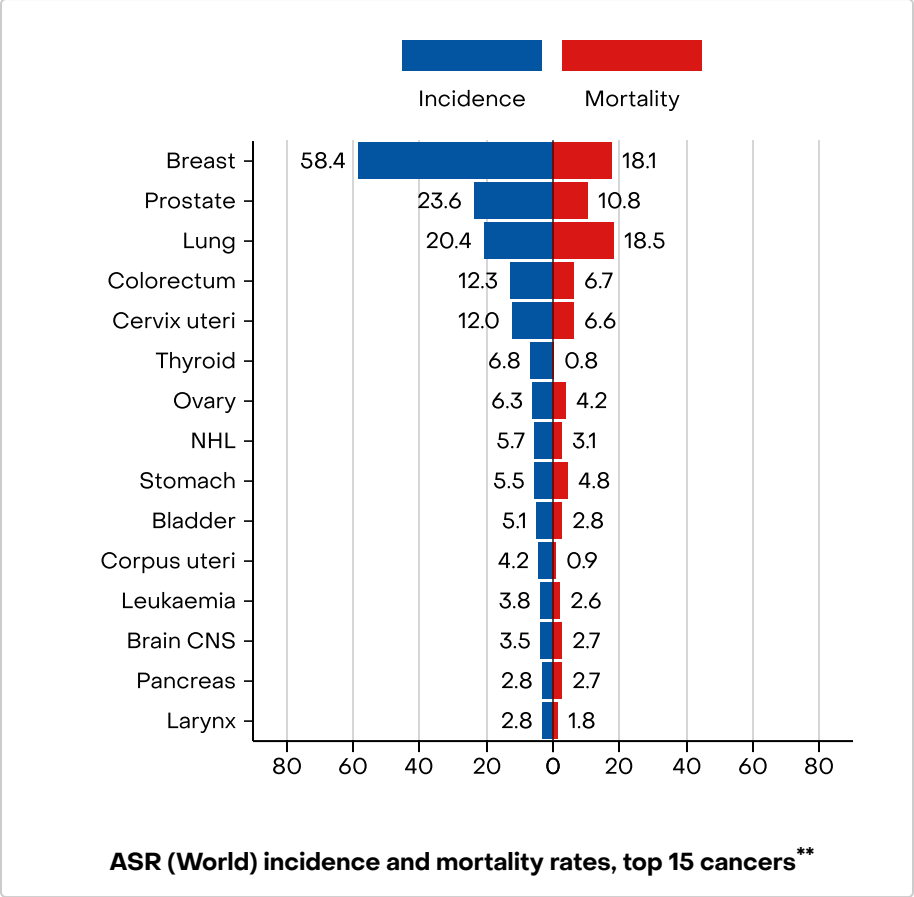

Mortality

Country-specific data source: Survival estimates
Method: Estimated from national incidence estimates by modelling, using mortality:incidence ratios derived from survival estimation

[Click here to see detailed data source and methods](#)

Prevalence

Computed using sex-; site- and age-specific incidence to 1-;3- and 5-year prevalence ratios from Nordic countries for the period (2011–2020), and scaled using Human Development Index (HDI) ratios.

* includes non-melanoma skin cancer (NMSC)
** NMSC included in other cancers
Age standardization using world population ([see link](#))
